

Electric Compass Tracker™

AFFORDABLE GPS TRACKING FOR YOUR FLEET

Electric Compass Tracker gives you total visibility into fleet activity. Improve fleet efficiency and customer service and cut your costs with affordable GPS Tracking. Multiple options for tracking devices and our web-based Command Center make it easy to get started.

- > Know where your vehicles/workers are at all times
- > Save on fuel costs
- > Cut overtime costs
- > Improve worker safety
- > Eliminate unauthorized vehicle use
- > Easy to get started and use

> FEATURES

- **GPS Vehicle Tracking** — Tracking devices in your fleet vehicles send out “pings” every one-to-fifteen minutes telling you where they are. But that’s not all, “pings” include travel direction and vehicle speed for full visibility into what is going on in the field.
- **Full Mapping with Live Traffic** – See live locations of all your vehicles on your choice of standard map or satellite view. Zoom to specific vehicles and open windows to follow individual vehicles. View live traffic from Google (we are a fully licensed user of Google enterprise mapping).
- **“Plug and Play” GPS Tracking Devices** – Just plug our tracking devices into the OBD-II port of your vehicle and your good-to-go. Our devices come to you pre-configured so once they’re installed you can start viewing your vehicles immediately. We also offer “black box” GPS devices if you would prefer a hard-wired solutions.
- **Vehicle History “Breadcrumbing”** – Sometimes where a vehicle has been is as important as where it is. Electric Compass Tracker’s breadcrumbing feature allows you to review vehicle travel history for better understanding of field operations and avoid unauthorized activity.
- **“Geofences” with Alerts** – Create custom boundaries around locations and know when your vehicles enter or leave them with real-time alerts to the dispatcher and by email. Set up circles by distance or draw your own polygons to create custom geofences.
- **Real-Time Alerts** – Electric Compass Tracker empowers you to set up real-time alerts for your fleet that monitor for excessive speed, geofences, and proximity to landmarks.

- **Find Closest Vehicle/Generate Best Route** – Enter an address and find the closest workers to a location to ensure fastest service and lowest travel cost. You can then generate accurate directions best route to the location.
- **Import your “Landmarks” and “Points of Interest”** – Import your customer list or service locations as “Points of Interest” and landmarks to see them on the map and use them to set up geofences and real-time alerts.
- **Fleet and Worker Reporting/Business Intelligence** – Electric Compass Tracker offers a wide range of reports that allow you to analyze field activity to improve fleet performance including activity report, speed report, after-hours report, hours worked report, travel history and more.
- **Intuitive Cloud-Based Tracking Command Center with Multi-Monitor Capabilities** – Electric Compass Tracker offers an intuitive and powerful Cloud-based Command Center that lets you take control of your fleet. Set user permissions edit users and vehicles for complete control.
- **Track Vehicle Maintenance** — Create maintenance schedules for your fleet with reminders for service. View vehicle service history for complete visibility.
- **Asset Tracking** — Electric Compass Tracker makes it easy with specialized tracking devices for construction equipment, trailers and other assets. Choose trackers that last from weeks to even years without recharging.
- **Smartphone Tracking App for Supervisors** – Never lose sight of your workforce with the mobile web tracking app.
- **Android/BlackBerry/Windows/Windows Mobile App** — Track smartphones alongside your vehicles.
